

1. Entering the building

Enter through the main entrance using the stairs. You will be greeted by one of our staff where your temperature will be taken, and escorted to the front desk for your court assignment.

2. Handwashing

After check-in, head over to the sink to wash your hands for at least 20 seconds.

4. Open air on courts

We've opened the garage doors to promote fresh air and better circulation while you're playing. We've also removed the metal doors used to enter the courts and replaced them with magnetic screens.

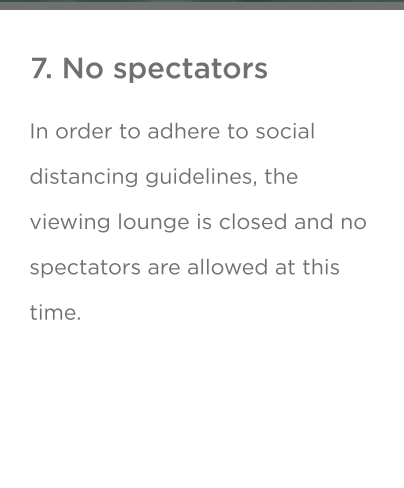

5. HEPA filtration

Prior to opening on July 6th, we installed HEPA filters in our HVAC system throughout the entire facility. We are current with all CDC & EPA guidelines. These filters will be changed every 3 months to ensure clean, circulated air.

6. 4 to 1 ratio

We are keeping the pro to players ratio at 4:1 to ensure social distancing while playing on the courts.

7. No spectators

In order to adhere to social distancing guidelines, the viewing lounge is closed and no spectators are allowed at this time.

8. Contact tracing

All members and employees who come in and out of the building will be tracked in order to keep a record in the event any one in the club tests positive for COVID-19.
